ROBERT FAIRLEY

Software Developer

Profile

Full-stack software developer with 10+ years of experience in web and related technologies.

Experience

Software Developer, Orderful; Vancouver, BC, Canada (Remote) — 2021–2024
Full stack development on a high-bandwidth, high-throughput logistics communications platform (EDI) as part of a team building out communication channel (AS2, SFTP, HTTP/S) systems. This work enabled integration with all modern and legacy systems used across the shipping and logistics domain.

Software Developer, St. Joseph Communications; Toronto, ON, Canada – 2019-2021
Continued following SJC acquisition of Rogers Media properties.

Software Developer, Rogers Media; Toronto, ON, Canada – 2016–2019
Full stack web and generalist development supporting the editorial and design teams at a range of magazine titles including Maclean's, Chatelaine, FASHION, and Today's Parent as well as Rogers Radio. Responsible for the design and development of novel digital publishing pipelines and editorial tooling, web features, diagnostic tooling, workflow assistance, and other software & operations support.
